

California Private Mails, 1849 to 1856

The California Private Mails, as defined here, were a group of privately owned firms that handled letter mail and newspapers to, from, or within California. They include the California expresses that transported mails to and within locales in California as well as local posts and the San Francisco letter bag operators who arranged transmission of mail by others.

This study deals with the mail systems and companies in operation prior to December 31, 1855. That date serves as a defined endpoint for the pioneer period as patterns of express activity changed significantly following the collapse of Adams Express, the dominant single express, in February 1855. The Pacific Express and other express companies arose from the collapse of Adams, and the age of Wells, Fargo & Co. domination began. Also, by 1856, the government postal system was able to provide reliable and inexpensive postal services to most areas of California.

This article will examine the different types of California private mail companies that operated in the period before the government post office was able to effectively serve California postal patrons. Although mail carrying was of minor importance to the vast majority of these companies who could make larger profits carrying gold and supplies, it was necessary as the communication component of the system. These express companies carried mail on ocean to ocean routes by steamship, on inland waterways by steamboats, and on mountain and landlocked division routes by stagecoach or on horseback. Working in conjunction when necessary, these diverse elements together formed a complex transportation system. It is this scheme, viewed as an integrated transportation and distribution system, that will be examined.

Background

Following the discovery of gold in California in 1848, massive immigration began when news of the discoveries reached the East. When William Van Voorhies, Special Post Office Agent for California and Oregon, arrived in the burgeoning city of San Francisco on February 28, 1849, he faced the impossible task of setting up postal facilities in a timely fashion. He had been instructed to set up coastal post offices in California which could be visited by the contract mail steamers.

Van Voorhies, as well as his successor R.T.P. Allen, faced a major problem; the cost of goods and services in California was vastly higher than in the East. Even though the agents were able to appoint postmasters in several towns, they were not able to secure contractors to carry the mail for the meager pay allowed. Congress, a distant 3500 miles away, had to approve mail transportation contracts for all routes that produced insufficient revenue. As a result, mails could not be transported within California until Congress could pass new legislation. Before any approved route contracts could be implemented, the contracts had to be advertised for bid, the contracts awarded and the news relayed back to California.

The mails that arrived by contract steamer at the San Francisco post office had to be distributed to patrons directly from their small office. Similarly, all mail destined for the East had to pass through the same post office in order to be placed on the next mail steamer out. It was not possible to serve that many postal patrons effectively from such a small office with the bulk of the demand concentrated on steamers' arrival or departure dates.

The residents of California located in San Francisco as well as over a vast interior area sought other solutions and were willing to pay for them. As a result, the postal needs of the population were met by private firms and individuals from an early date and the popular and efficient express services continued well beyond the establishment of the post offices.

The situation was well summarized in an article that appeared in the July 27, 1850 issue of the San Francisco newspaper *Daily Alta California*:

EXPRESS COMPANIES - We scarcely know what we should do if it were not for the various Express lines established, enabling us to hold communication with the Mines. With the present defective mail communication we should scarcely ever be able to hear from the towns throughout California, or the remote portions of the Placers, north and south. Our enterprising Express agents however supply the deficiency, and my promptitude with which they attend the transmission of letters and packages, and the fidelity with which they conduct all business entrusted to them, are justly entitled to the confidence and support of the community. Their expenses are necessarily very heavy and it requires a liberal patronage to remunerate them. Hawley & Co., Todd & Bryan and Berford & Co., are the three lines holding communication with different sections of the country. We commend them all to the liberal patronage of the public, and beg to acknowledge to all of them our indebtedness for numerous acts of kindness and courtesy.

The Transportation Schema

In this pioneer period, the transportation system expanded geographically and evolved slowly but the primary routes and basic transportation methods remained constant. For westbound mail from the East addressed to a miner at one of the mining camps near Sacramento City, the first leg was the ocean to ocean service. This included transit from an eastern port, via steamship (defined here to include all ocean-going, steam powered vessels) operating on the Atlantic Ocean. Then came land transit across Panama or Nicaragua if needed, and finally by steamship operating on the Pacific Ocean to San Francisco. A distinct group of expresses, classified here as the *ocean to ocean expresses*, provided this service.

The second leg on the journey, after arrival of the mail at San Francisco, was the onward transmission by steamboat up the Sacramento River to one of the major distribution points along the waterway, in this example Sacramento City. A second group of expresses provided the requisite steamboat service and are classified as *trunk line expresses*. There were four early ports that served as divisional distribution points (see Figure 1): San Francisco, Stockton, Sacramento, and Marysville. Shasta developed into an additional division point and was reached by a combination of steamboat and stage routes.

The steamboat service from San Francisco to the Stockton division point traversed San Francisco Bay and Delta to the Sacramento River. Other division points were reached via the Sacramento River to Sacramento City and north past its confluence with the American River to Marysville where the

Figure 1. Map of rivers and division points

Yuba River joins the Feather River. Shasta was first reached by stagecoach route from Marysville and later by steamboat to Colusa and then by stage.

The third leg on the journey was from the division point to the addressee if he were located outside the distribution center. Mail was distributed by various means including on foot, by horse, by stage, or by a combination of these transportation modes. This group of expresses is classified here as *divisional expresses*. Each division point served a unique geographical area or division.

As the transportation network matured, some of the companies began operating on more than one of the three segments. The successful ocean to ocean expresses made substantially larger profits than the trunk line expresses which, in turn, made more money than the divisional expresses. This was usually in proportion to the amount of gold each bloc of expresses was handling, as well as the amount of financial services that they offered. In an effort to assure their continued supply line of gold from the mines, the ocean to ocean expresses made alliances, usually exclusive, with the trunk line expresses and even the divisional expresses. As the disparity in profits increased, the larger firms often purchased the feeder trunk line and divisional expresses. Usually, what was formerly the express firm became an agent for the larger company and continued as an integral part of the transportation scheme. As a result, the three-tier model still works well conceptually. Each of the three major components of the transportation system can now be described in more detail.

The Ocean to Ocean Expresses

This group of express companies includes those firms that operated between San Francisco and the East. This link in the transportation system was utilized primarily to transport gold from the California mines to New York but mail was also carried. It should be noted that from an early date the post office carried the majority of mail that required ocean to ocean transport. The private firms operated on all available steamships and used both the contract mail route via Panama as well as the non-contract via Nicaragua route.

The most important of the ocean to ocean expresses during this period were: Adams & Co's Express, Berford & Co's Express, Gregory's Atlantic & Pacific Express, Pacific Express (after February 1855), and Wells, Fargo & Co's Express. In addition, some steamship lines received private mails directly for transmission. The two primary routes these expresses used will be briefly described. The via Nicaragua route was never used for contract mails, while the via Panama route was used both by the post office as a contract route and as a route for private express mail.

The Via Nicaragua Route - Cornelius Vanderbilt founded his Independent Line with the intent to operate a passenger and mail route across Nicaragua in opposition to the contract mail steamers operating via Panama to California. He chose the route (shown in Figure 2) because it was substantially faster than the longer contract route. In 1853, his Accessory Transit Company received a concession from Nicaragua to cross the country. The route was by steamer from New York to San Juan del Norte on the Mosquito Coast of Nicaragua, by river to Lake Nicaragua, across the lake to Rivas, by stage to San Juan del Sur, and by steamer to San Francisco.

Figure 2. Map of the via Nicaragua route

Use of the route decreased after William Walker's military incursion into Nicaragua in 1855, and the route was abandoned in early 1857. Later, Vanderbilt extorted a monthly stipend from the companies that held the via

Panama mail contracts, and his Accessory Transit Company ceased to operate.

All mail carried over this route was carried privately and did not enter the government mails until an entry port was reached after the ocean to ocean transport was complete. Many such uses bore propaganda handstamps such as "Via Nicaragua Ahead of the Mails" and soon other competing lines began carrying mails without a contract. Some of these handstamps were applied by letter bag operators in San Francisco while others were applied by the steamship offices or the express companies themselves.

The Via Panama Route - The most important government mail contract route connecting California and the East was via the Isthmus of Panama (Figure 3). This route, which utilized steamships on the Atlantic and Pacific Oceans, carried the majority of government mail during the period between 1849 and the July 1, 1861 commencement of a daily overland mail on the central route. In addition to the contract mails carried on the via Panama route, some ocean to ocean express companies used the same contract mail steamers to transport express agents and their private express mail bags.

Figure 3. Map of the via Panama route

There were three segments to the route. The United States Mail Steamship Company (USMSC) held the contract for mail on the Atlantic side with service from New York to Chagres commencing on October 1, 1848. With the opening of nearby Aspinwall the port was changed in March 1852. The Pacific Mail Steamship Company (PMSS) held the contract for mail on the Pacific Ocean. Their service on the Pacific commenced with January 17, 1849 departure of PMSS steamer *California* from Panama City with mail for San Francisco. The third section was the seventy mile trail across the Isthmus of Panama that connected the two ocean mail routes. Original service was provided by the PMSS, but on January 1, 1852 the transit contract was given to the Panama Railroad Company. The railway was completed in January 1855.

The California Trunk Route Expresses

The primary commercial route between San Francisco and the mining supply camps of the interior was by inland waterway. This main line included the San Francisco Bay and Delta, the San Joaquin River south to Stockton and the Sacramento River, north past Sacramento City, and up the Feather River to Marysville.

Commercial steamboat navigation on the trunk line can be dated to October 1849 when the first commercially successful steamer arrived on the Sacramento River. It was the 226-foot side-wheeler *Senator* that had arrived safely after a seven-month trip from New York. She was soon joined by others, including the *New World*, also operated by the People's Line. The People's Line dominated until the independently owned screw-propeller steamer *McKim* arrived on the river. In 1851, the Union Line inaugurated service with two steamboats, the *Confidence* and the *Wilson G. Hunt* and by year end there were at least thirty steamboats operating on the Sacramento River.

Many of the early expresses operated only between division points by steamboat and only as far as another of the four primary division points, namely San Francisco, Stockton, Sacramento City, and Marysville. From the division points, express matter and mail was usually distributed by other modes of conveyance to a final destination by one of the divisional expresses. The Shasta division point was first served from Marysville and later by steamboat to Colusa and then stagecoach.

Among the primary trunk route expresses operating during this period were: Adams & Co's Express, C.A. Berford & Co's Express, Todd's Express, Freeman & Co's Express, Gregory's Express, Hawley's Express, Mumby & Co's Express, Newell & Co. Express, Pacific Express, Reynolds & Co's Express, Todd's Express, and Wells, Fargo & Co's Express.

The Divisional Expresses

This group of expresses is the most diverse in terms of modes of transportation utilized. Although most of these distribution points were within reasonable distance to their service areas (see Figure 4 map), some expresses operating from San Francisco served additional points along the entire California coastline. Because of these differences, the divisions will be examined separately.

The San Francisco Division express companies did not have to operate over rough mountain terrain to mining camps. Instead, their service area included business and commercial centers around the Bay and Delta as well as coastal California ports (not shown on map).

Many of the areas, such as San Jose, could be easily reached by steamboat or over well developed stage coach roads. To reach additional coastal California ports the use of sailing vessels, or steamers over longer routes, was required.

As a result, the companies servicing this division were a much more diverse group than their counterparts elsewhere. The companies serving the coastal towns or inland towns situated on stage roads generally carried mail completely outside of the government mails. Express matter and letters could be dropped off and collected directly at the express offices with no government mail service involved.

The Stockton Division expresses primarily served the Southern Mines and the smaller supply towns in the area as shown on map. Mail was received from steamboats operating from San Francisco or points up the Sacramento River. Like the other mountain express companies, the portion of service beyond Stockton was handled by stage and horse.

During the pioneer period, Todd & Company and Newell & Co. expresses operated between Stockton and San Francisco by steamer. Although they also operated by coach to Sonora as well, the leading divisional express serving the mountain mining camps was Brown's Express.

The Sacramento Division express companies operated from the primary hub of gold mining activities in California. Sacramento City was located at the point where the American River joined the Sacramento River.

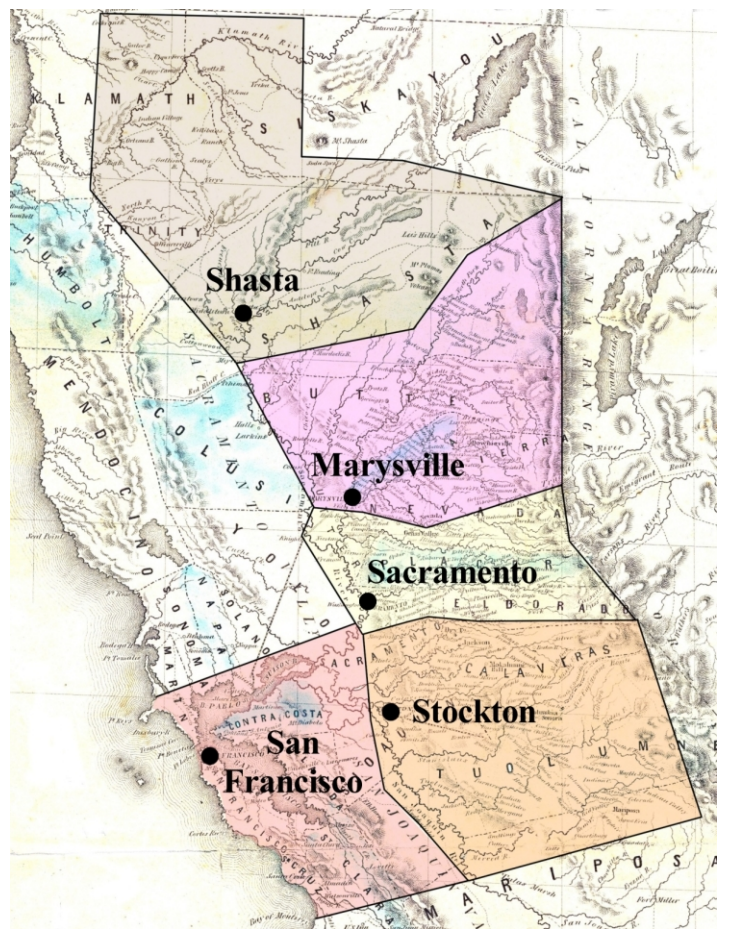

Figure 4. Map showing Divisional express service areas

The American River watershed area was home to the first gold discovery at Sutter's Fort in 1848, and also many of the earliest producing placer mines.

The influx of a large number of gold miners to the area in 1849 brought with it an enormous load on the transportation and banking systems. The miners working in the isolated mining camps up the Feather River and its branches required food, mining equipment, a way to transport their gold to buyers and communication with the outside world.

Typically, the Sacramento Division express companies carried supplies, newspapers and mail from Sacramento City to the miners and returned with gold to be shipped, via brokers and banking centers, to the East. In the Sacramento City Division, the express companies initially transported their cargo on foot, horseback or in small carts. The Sacramento Valley Railroad was not completed until 1856.

The Marysville Division express companies gained prominence after gold mining activities on the upper Feather and Yuba Rivers reached significant levels. It developed into a primary transportation hub and river port as steamboat routes were extended from Sacramento northward on the Sacramento River to Marysville.

In general, the mining camps in northern California that were served from Marysville were less concentrated than those in the Sacramento City Division. They also generally required longer transportation lines, particularly following the 1853 mining boom near Shasta. These long overland trips mostly traversed flatter terrain which allowed the use of stage coaches as well as carts at an early date. Marysville also served as an express center for the early mines in southern Oregon Territory.

The Shasta Division express companies did not become significant until late in the period. The mines in the area were initially served from Marysville and most of the pre-1853 expresses are more properly classified as operating from the Marysville division point. After the wealth of the area became apparent during the 1853 boom, its importance increased and became a true division point with direct service from San Francisco. Steamboats ascended the Sacramento River as far as Colusa during the period before 1856; between Colusa and Shasta, stage coaches were employed. The mining region served from Shasta extended north beyond the Oregon border when the Klamath River mines opened.

The Interface Between Post Office and Private Express Mails

During the period under discussion, 1849-1856, the postal system in California expanded rapidly. In 1849 and 1850, most post office mail from the East was directed to either the San Francisco or Sacramento post offices as more precise locations were unknown to eastern correspondents. The express companies handled almost all of the mail from those offices to the miners working in the gold fields. From November 1849, regular bi-monthly mail service between San Francisco and the East was the norm. As new California post offices became operational, defined as having a post office and had at least some form of regular contract mail service, government mail could be sent over routes previously the sole domain of the express companies. The Stockton office became operational in October 1849 and the Marysville office in August 1850.

The method employed by Alexander Todd, one of the earliest California expressmen, is typical. Todd, who in 1849 was at the gold diggings 150 miles from San Francisco, started a signature list of fellow miners who authorized him to pick up mail for them at the San Francisco post office. Initially, Todd charged \$1.00 for checking for mail and took gold in payment for each letter he returned with. He also agreed to carry letters from the mines to the post office for \$2.50 each. On his first trip to San Francisco his pack mule was laden with letters going to the post office. Traveling through Stockton, the local merchants engaged him to carry their gold to San Francisco. This formula of carrying treasure as well as letter mail made the journey very profitable for Todd.

With the improvement of government postal arrangements the number of ocean to ocean expresses decreased. Those that survived turned to alternate routes, such as the via Nicaragua route after 1853, or relied on profits generated by banking or the carriage of gold. Similarly, the express companies that operated only via steamboat on the trunk line were forced to increase their operations beyond carriage of letter mail, or lower fees, or both.

With time, this pattern repeated itself frequently as the postal service reached more interior towns with regular service. The large companies thrived, particularly in their banking and gold shipping operations, while the smaller outfits were forced to add routes and lower letter mail rates. The divisional express companies expanded their coverage area and followed the miners to the newest booming locations. This expansion required the extension of transportation lines. The success of these smaller operators increasingly depended on their ability to team with reliable partners such as Wells, Fargo & Co. Express or Adams & Co's Express.

Adams & Company had been established in Boston in 1839 as a banking and parcel express company. Late in 1849, a separate partnership was set up for operations in California. Adams formula was to appoint agents in the numerous small mining camps who could conduct banking operations on their behalf. In addition to the banking of gold dust, Adams transported gold to San Francisco, and thence to the East. They also transported merchandise, parcels and letter mail between the mining camps. Letter mail carrying was an adjunct to their primary operations but it was not expensive for their messengers to carry a pouch of mail on their routes. Agents who accompanied the gold shipments to the East also took letter mail. Adams purchased several of the smaller letter expresses and subcontracted the staging out to others. By 1854, Adams & Company had become the largest shipper of gold dust and had developed a vast network of agents and staging lines throughout California. However, in February 1855, as a result of the failure of a major Eastern banking partner, Adams was forced to close their doors in California.

Wells, Fargo & Company adopted the Adams formula of combining banking, express haulage of parcels and gold, and carriage of letter mail by both overland and ocean routes. Reuben Washburn established the first California branch of Wells, Fargo & Company upon his arrival on July 13, 1852. They soon perfected the formula and became the dominate force in the California express business after 1855. Wells, Fargo & Company purchased competing businesses to expand their routes, formed partnerships with those they could not purchase, loaned money to express and haulage companies, and formed alliances with others.

On January 13, 1854, U. S. special postal agent Fry gave notice to the express companies that they must have U.S. postage prepaid on letter mail in an amount equivalent to the postage if carried in the government mails. After postal stationery entires became widely available, the express companies introduced printed franks. Early advertisements for Wells Fargo & Co. printed franks began running on August 16, 1855 and state:

We will furnish Government Three Cent Envelopes with our "Frank" upon them, at a rate of \$12.50 per hundred, which will convey single Letters enclosed therein over our California or Coast Routes free of charge.

The Ten Cent Government Envelopes, with our "Frank," will be furnished at \$20 per hundred, which will carry single letters enclosed therein, free of further charge, through our Atlantic Express.

The use of printed express franks on government entires proliferated in the period after 1855 as many new companies began operating in smaller and more remote areas of California. The end of this pioneer period saw the lessened importance of the express companies in the transcontinental transmission of mail. This role changed again in 1860 with the arrival of the Pony Express on the overland route.

Summary

The private mail-handling companies provided a range of services that were vital to the growth of California in the period between 1849 and 1856. In addition to banking and the carriage of gold and express matter, this group of companies provided reliable letter mail communication to the residents in the period before efficient government postal service was available.

Previous philatelic literature has focused primarily on the individual companies rather than on the overall transportation schema that was employed in the transportation of mail. This schema combines different types of companies with correspondingly different modes of service over extended routes. Three main categories of company type can be identified: companies that provided ocean to ocean service by steamship, companies that operated over the trunk line by steamboat to the division points, and a third group of companies that operated from one of the five division points to a regional service area.

This overview of the interaction between the various types of private companies, as well as their interaction with the government postal service, helps to understand the disparate elements that combined to result in an effective communication system in the pioneer period.

California Local Posts, 1849-1856

Emigrants to San Francisco arriving from major eastern cities before 1856 were already familiar with a group of privately owned mail companies, called local posts, that operated within a single city. Typical services offered by these posts included delivery from letter reception boxes to the post office, delivery from a post office to a street address, and the delivery from a box or company's office directly to a street address carried completely outside the U.S. mails. In many cases these posts were one-man operations. With time, the post offices established carrier service by government employees obviating the need for private local posts. However, in San Francisco, no government provided carrier service was available prior to 1868.

This class of private mail-handling company was slow to arrive in San Francisco. The earliest reported mail delivery service was briefly advertised in February 1850 by Charles Kimball, later famous as the "Noisy Carrier." As the express companies dominated mail service within California, it devolved upon that class of company to provide local delivery service at an early date. Henry Reed is known to have been employed by Adams Express as a letter and parcel delivery person prior to February 1851.

Notice of a city dispatch post organized by Berford & Co. Express appeared in the October 12, 1851 *Daily Alta California*:

CITY EXPRESS - We are happy to notice that an enterprise has been undertaken which will prove of great convenience to our citizens. Messrs Berford & Co. intend to establish a city dispatch post. Arrangements have been entered into with the Post Master, by which the concern will have it in their power to procure letters from the post office at the earliest possible moment. Three deliveries will take place during the day, the first at eight o'clock in the morning, the second at noon, and the third at four o'clock in the afternoon. Parcels also can be left at the Express office for any part of the city, as a wagon will make the round of the city daily. Boxes for the city post will be placed in the hotels and other public houses, and letters will be promptly and faithfully delivered. The charge on each letter has been fixed at ten cents. ...

This City Dispatch Post appears again in October 1851 newspaper accounts as being in operation. No postal artifacts have been identified as having been handled by this post.

The previously mentioned Henry Reed began advertising on his own, styled as Reed & Co. City Despatch Post, on December 7, 1853 with his address listed as the Adams Express office. He continued in operation beyond the February 1855 collapse of the Adams firm.

Henry L. Goodwin established his California Penny Post Company on June 25, 1855. In addition to other services, he operated a local post in several California cities until suppressed by the San Francisco postmaster in October 1855. His published rate schedule for San Francisco lists three city deliveries daily. Fees listed include 2 cents for conveying a letter to the post office and five cents for delivering a letter from the post office.

Although additional express companies may have hired delivery people to handle local mail, no other independent local post companies have been identified in the period prior to 1856.

San Francisco Letter Bag Operators

The phrase "letter bag operators" has a specific meaning that is uniquely applied to a group of private individuals and news rooms that operated in San Francisco. In the long tradition of coffee houses and news rooms on the East coast, these firms maintained bags for the deposit of outbound mail. The need for this service arose because many of the steamers available for carrying mail were without government contracts and usually did not receive mail for carriage directly from the post office. The bags of mail were delivered to the San Francisco post office, a steamship agent, or directly to a non contract steamship departing San Francisco. Often the letters were handstamped by the letter bag operator or the steamship agent to publicize their service.

Edward E. Dunbar first announced his Merchants' Exchange and News Room in San Francisco in an advertisement, dated November 15, 1849, that appeared in the *Placer Times* and elsewhere. The Merchant's Exchange also received mention in a *Weekly Pacific News* article that commented:

(it) is about the most comfortable place to spend an evening that there is in town. The room is well lighted and warmed, and has papers of the latest dates from the United States and Europe. Some place, other than the drinking houses, where strangers and citizens could spend an evening, has long been needed.

The advertisement specifically mentions that "letter Bags for the various mails are kept at the Office" and that "half-yearly subscriptions are being received from merchants" and others" while "Parties from the mines can for a small sum avail themselves ... by the day, week, or month."

The most widely known of the San Francisco letter bag operators was Charles Kimball, San Francisco's "Noisy Carrier." After his attempts in 1849 to operate an express between Sacramento and San Francisco, and his failed attempt to establish a city delivery post in February 1850, Kimball started his newspaper "crier" career in April. By the end of 1850 Kimball was publishing a directory from his publishing hall at 77 Long Wharf. By 1853, Kimball was also serving as a letter bag operator. His "Noisy Carrier" handstamps exist on eastbound mail in a wide variety of styles. Although his handstamps are known on mail delivered to contract steamers, most were used on mail that was sent by non contract steamers via Nicaragua and these often include the language "Via Nicaragua, Ahead of the Mails."

In July 1850 Still & Conner's Bookstore and newspaper depot advertised prices current prepared for the steamers. Later, while operated as John N. Still's bookstore, a handstamp was briefly used.

By January 1852, Leland & Sullivan were advertising their news room located at the "Post Office Arcade." Their May 31, 1852 advertisement in the *Daily Alta California* mentions that a letter mail bag "will be kept open all night" for mail to be sent on the contract steamer departing the next day. The advertisement also mentions that postage stamps and letter paper are available for sale. By June 30, 1853, J. W. Sullivan and George H. Leland had separated ways and were operating in competition. Both of their advertisements appear on that date above a third notice of a mail bag being kept at Lecount & Strong opposite the General Delivery entrance to the post office. No markings associated with Lecount & Strong have been identified.

As the importance of mail by steamship lines running in opposition to the post office contract steamers diminished after the close of the via Nicaragua route in 1856, the need for letter bag operators also ended.

Noisy Carrier (1850 - 1856)

Charles P. Kimball briefly operated an express between San Francisco and Sacramento in October 1849, advertised a short-lived city letter delivery service in February 1850, and by March was "crying" newspapers. Kimball began publishing in September 1850. He was soon handling mail as the premier letter bag operator. From his location on Long Wharf he sold stamps at par and offered free delivery of mail to either the post office or the next non-contract steamer.

California Expresses, 1849 - 1856

Lines of communication for California, both internal and external, developed rapidly in the years following the discovery of gold in 1848. Private mail systems played an major role in the transmission of letter mail as well as newspapers prior to the establishment of efficient government postal service. During the period of this transition, systems were developed by private operators that were later emulated by the government postal service. The private express firms handled mail between California and the East, mail between the major jumping-off points along internal waterways, as well as mail between these division points and the miners in their camps. In addition to the express companies, private firms offered mail forwarding services, local post service, and letter bag operators arranged mail carriage on the next departing steamer.

This display of mail carried by early California expresses illustrates the systems developed by the pioneer express lines and companies that operated prior to December 31, 1855. This date serves here as a defined endpoint for the pioneer period as patterns of express activity changed significantly following the collapse of Adams Express in February 1855. Although the Pacific Express and other companies arose following the collapse of Adams, and new mining areas were discovered, the era of Wells, Fargo & Co. domination had begun.

In this pioneer period, the main trunk line for letters, express goods and supplies to reach the mining camps was by steamship to San Francisco, and then by steamboat to the major distribution points along the waterways. There were four early ports that served as major divisional distribution points: San Francisco, Stockton, Sacramento, and Marysville. A fifth point, Shasta, was reached by combination of steamboat and stagecoach service. Each of these division points served a unique geographical area or division. Steamboats operated from San Francisco to Stockton and north on the Sacramento River to Sacramento City, past its confluence with the American River to Marysville where the Yuba River joins the Feather River. Once a division point was reached, express letter mail could be forwarded onward to the mines by steamboat, stage coach, horse or mule, or on foot depending on the terrain and conditions.

map showing rivers and division points

The display is organized on the following plan:

I. The Ocean to Ocean Expresses: This group of firms operated between California and the East using steamships. Many employed express agents onboard the vessels to accompany shipments.

II. Trunk Route Expresses: This group operated by steamboat on the main waterway trunk route that connected the division points.

III. The Divisional Express: This group operated between the major division points and the mining areas and towns in their division. The division points were San Francisco, Stockton, Sacramento, Marysville and Shasta.

The Ocean to Ocean Expresses

This group of express companies includes those firms that operated between San Francisco and the East. Although this link in the transportation system was utilized primarily to transport gold from the California mines to New York, mail was also carried. These private firms (denoted by steamship icon) operated on all available steamships operating over the via Panama and via Nicaragua routes.

Some steamship lines received private mails directly for transmission in addition to mail carried by express agents. The via Nicaragua route was never used for contract mails, while the via Panama route was used both by the post office as a contract route and as a route for private express mail.

The Via Nicaragua Route - Cornelius Vanderbilt founded his Independent Line with the intent to operate a passenger and mail route across Nicaragua in opposition to the contract mail steamers operating via Panama to California. He chose the route because it was substantially faster than the longer contract route. The route was by steamer from New York to San Juan del Norte on the Mosquito Coast of Nicaragua, by river to Lake Nicaragua, across the lake to Rivas, by stage to San Juan del Sur and by steamer to San Francisco.

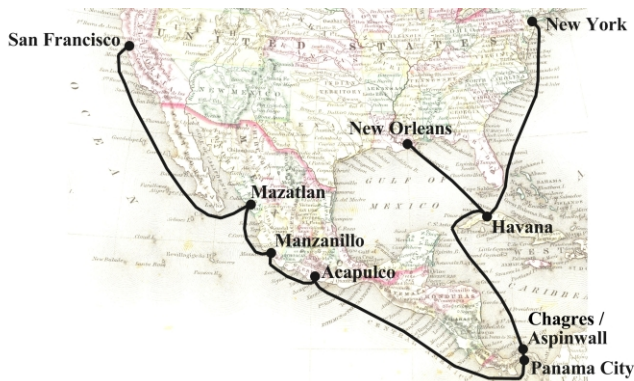

via Nicaragua route map

Use of the route decreased after filibuster William Walker's incursion into Nicaragua in 1855 and the route was abandoned in early 1857. Later, Vanderbilt extorted a monthly stipend from the companies that held the via Panama mail contracts and his Accessory Transit Company ceased to operate.

All mail carried over this route was carried privately and did not enter the government mails until an entry port was reached after the ocean to ocean transport was complete.

The Via Panama Route - The most important government mail contract route connecting California and the East was the route, via the Isthmus of Panama, between San Francisco and New York. This route carried the majority of government mail during the period between 1849 and the July 1, 1861. In addition to the contract mails carried on the via Panama route, some transcontinental private express companies used their own, or the same contract steamers to carry their agents, often accompanied by express mail bags, over the same route.

via Panama route map

There were three segments to the route. The United States Mail Steamship Company (USMSC) held the contract for mail on the Atlantic side with service from New York to Chagres commencing on October 1, 1848. With the opening of nearby Aspinwall the port was changed in March 1852. The Pacific Mail Steamship Company (PMSS) held the contract for mail on the Pacific Ocean. Their service on the Pacific commenced with January 17, 1849 departure of PMSS steamer *California* from Panama City with mail for San Francisco. The third section was the seventy mile trail across the Isthmus of Panama connected the two ocean

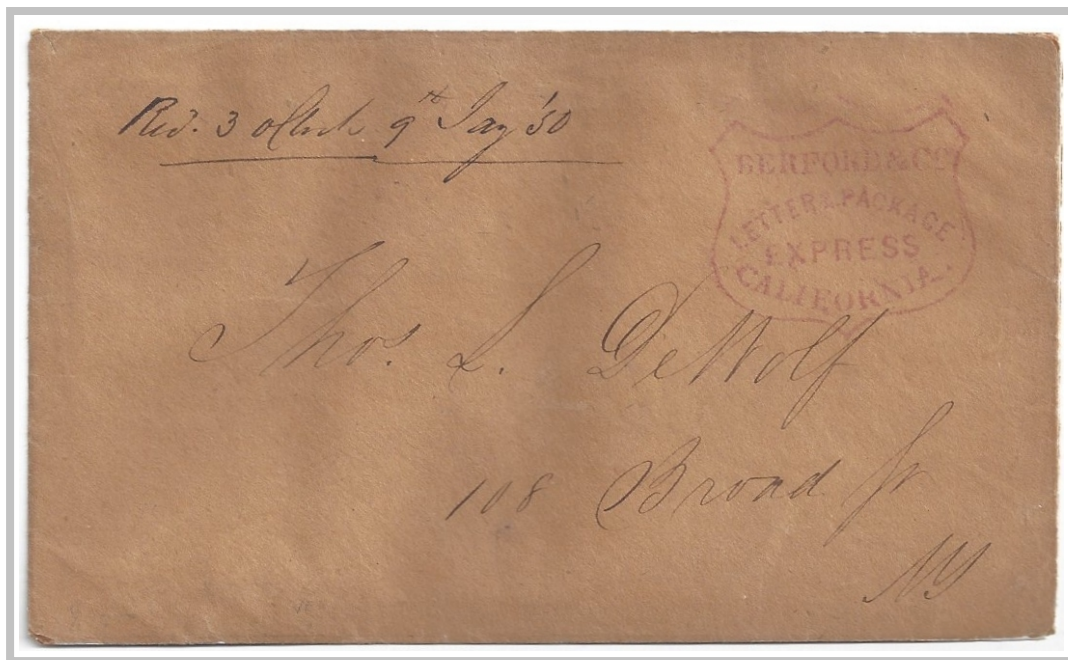

mail routes. Original service was provided by the PMSS but on January 1, 1852 the transit contract was given to the Panama Railroad Company. The railway was completed in January 1855.

Berford & Co's Express (1849 - Feb 1851)

ocean to ocean

Berford & Co's Letter & Package Express was founded by Richard G. Berford in the fall of 1849 after his arrival in San Francisco on May 8. The express operated between coasts and advertised agents on all Pacific and Atlantic steamers. A December 1849 advertisement listed offices in San Francisco, Sacramento City (T. J. Bayless), San Jose (Plitt), and Stockton. In December 1850 they began advertising as the only express operating to San Jose. The last California advertisement for his ocean to ocean service appeared on February 26, 1855.

Palmer & Co's Express (Mar 1850 - Dec 1851)

ocean to ocean

Palmer & Co's Express was founded by Cyrus S. Palmer in New York on March 7, 1850. The express operated between coasts and briefly advertised offices in Sacramento and Marysville. The last mention found appears in the New York *Weekly Herald* of December 6, 1851 thanking the company for papers received.

12 November 1850 from San Francisco to New York by Palmer & Co's Express endorsed to be carried by a friend on the George Law's Pacific Line steamer *Antelope* (first return voyage) instead, carried by Palmer's agent on the PMSS steamer *Tennessee* that departed November 15, 1850

letter mentions: *I should not write before the 15th (steamer day) but a friend Mr. Henry B McIlwain is returning .. the steamer by which he goes, the Antelope, leaves this afternoon at 3 o'clock.*

Gregory's Atlantic & Pacific Express (Apr 1850 - Nov 1852)

ocean to ocean

Gregory's Atlantic & Pacific Express was founded by Joseph W. Gregory initially as an ocean to ocean express. His advertisement, under the name of "Gregory's New York Express" of April 18, 1850 in *Daily Alta California* mentions that he has secured W.S. Sloan to act as a messenger to New York. By August 1850, Hitchcock is listed as agent in New York City and on October 31, 1851 G. E. Clark is listed as an agent in Sacramento. His service eventually expanded within California to Marysville and his ocean service was advertised as the only express on the Nicaragua route. Gregory quietly sold his express business to Wells Fargo & Co. in 1852 and his last advertisement appeared in the November 20, 1852 *Daily Alta California*.

Adams & Co's Express (Nov 1849 - Feb 1855)

ocean to ocean

D.W. Haskell was sent by Adams & Co's Express to organize a California operation for banking and the safe transmission of gold between California and New York. He arrived in San Francisco on October 31, 1849. The new branch of the nationwide Adams Express company quickly became the leading express throughout California by expanding routes and purchasing smaller express companies. On February 23, 1855 Adams & Co's Express closed their California operations as a result of a financial and banking crisis.

The Trunk Route Expresses

steamboat *Senator* at Sacramento City in 1849

This group of express companies (denoted by a steamboat icon) includes those firms that operated by steamboat connecting the four major division points. A minor division point, Shasta, required transportation by steamboat and stagecoach. The main routes are shown in map below in red.

The primary commercial route between San Francisco and the mining supply camps of the interior was by inland waterway. This main line included the San Francisco Bay and Delta, the San Joaquin River south to Stockton and the Sacramento River, north past Sacramento City, and up the Feather River to Marysville.

Commercial steamboat navigation on the trunk line can be dated to October 1849 when the first commercially successful steamer arrived on the Sacramento River. It was the 226-foot side-wheeler *Senator* that had arrived safely after a seven-month trip from New York. She was soon joined by others, including the *New World*, also operated by the People's Line. The People's Line dominated until the independently owned screw-propeller steamer *McKim* arrived on the river. In 1851, the Union Line inaugurated service with two steamboats, the *Confidence* and the *Wilson G. Hunt* and by year end there were at least thirty steamboats operating on the Sacramento River.

Many of the early expresses operated only between division points by steamboat and only as far as another of the four primary division points, namely San Francisco, Stockton, Sacramento City, and Marysville. From the division points, express matter and mail was usually distributed by other modes of conveyance to a final destination by one of the divisional expresses. The Shasta division point was first served from Marysville by stagecoach and later by steamboat to Colusa and then stagecoach.

map of trunk route (shown in red)

Gregory's Express (Nov 1849 - Feb 1855)

trunk route

In addition to Joseph W. Gregory's Atlantic & Pacific Express ocean to ocean express, he organized Gregory's Express to operate within California. His service began with offices in San Francisco and Stockton and soon expanded to Sacramento City and Marysville. Gregory quietly sold his express business to Wells, Fargo & Co. in 1852 and his last advertisement appeared in the November 20, 1852 *Daily Alta California*.

Hawley & Co's Express (Jan 1850 - Nov 1850)

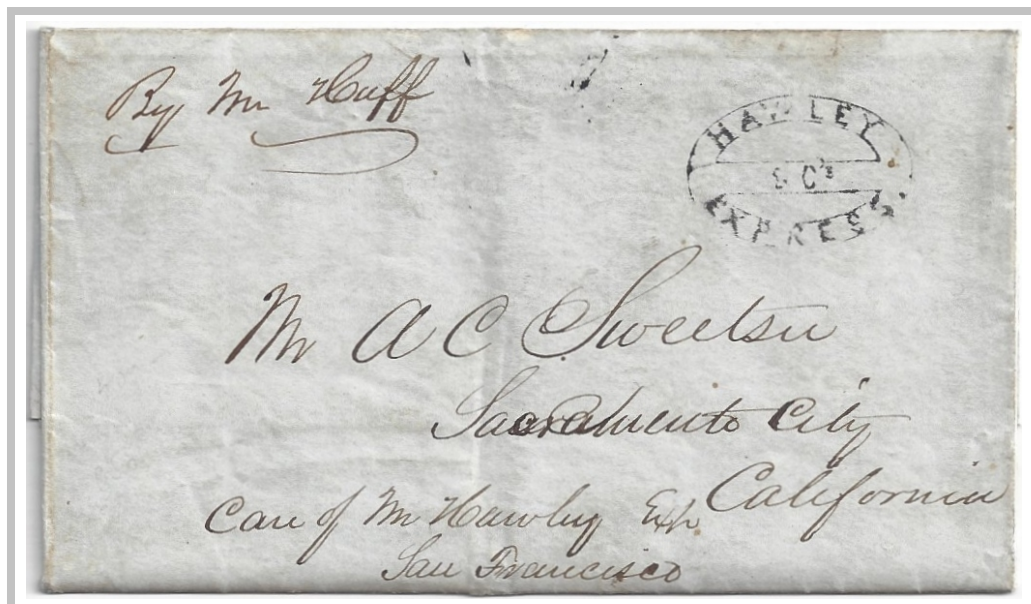

trunk route

Hawley & Co's Express was founded by T.R. Hawley after buying out his partners in Weld & Company Express in January 1850. At the same time he acquired the exclusive right to carry gold, letters and express matter on the steamer *Senator* operating on the Sacramento River. This express operated between the main office in Sacramento to San Francisco utilizing People's Line steamboats. Adams Express operated as Hawley's agent in San Francisco. After John M. Freeman purchased one-half interest in Hawley's Express in June 1850, operations were expanded to include steamboat service to offices along the Yuba River north to Marysville. Freeman bought out Hawley's interest in the express on November 11, 1850.

Hawley & Co's Express (Jan 1850 - Nov 1850)

trunk route

By the end of November 1849 regular steamboat service connected San Francisco and Sacramento City. Service soon was extended north to Marysville. This major steamboat trunk line was dominated by two primary operators, the People's Line and the Union Line. Hawley & Co. had exclusive rights to carry express matter on People's Line while Mumby & Co. used Union Line steamboats.

 **PEOPLE'S LINE FOR SACRAMENTO CITY**—September Arrangement—Every afternoon from Cunningham's wharf at 4 o'clock, the well known, fast sailing steamers Senator and New World will leave as follows:

NEW WORLD, Captain Wakeman, every Tuesday, Thursday and Saturday. Returning from her berth foot of K street Sacramento City every Monday, Wednesday and Friday at 2 P. M.

SENATOR, Captain John Van Pelt, every Monday, Wednesday and Friday. Returning, will leave her berth foot of K street every Tuesday, Thursday and Saturday at 2 P. M.

Freight or passengers taken at the lowest rates. Tickets can be had, and all information can be had by applying to the clerk on board or to

CHARLES MINTURN, Agent,
On the wharf.

Freeman & Co's Express (Nov 1850 - Nov 1851)

trunk route

John M Freeman bought out T.R. Hawley's interest in Hawley's Express on November 11, 1850. The route was between Sacramento City and San Francisco by steamboat with further steamboat service to river offices north to Marysville. Adams Express operated as Freeman's agent and expediter in San Francisco. The express served as a trunk line connecting at Sacramento with Bower's Express for service to Nevada City and with Langton's Express for service to Downieville. After his purchase of Mumby's Express in June 1851, Freeman sold out to Adams & Co on November 8, 1851. After serving as an agent for Adams & Co for several years, he started a new Freeman's Express after Adam's failure in February 1855.

FREEMAN & CO'S EXPRESS, DAILY TO SACRAMENTO CITY, MARYSVILLE AND NEVADA CITY. F. & CO. have safes in their express rooms on board the fast steamers Senator, New World and Gov. Dana, for the security of treasure entrusted to them, which is always accompanied by faithful messengers. Orders, bills, packages, &c. forwarded, and all business pertaining to an Express promptly attended to. F. & CO. is the only firm in the Valley of the Sacramento connecting with Messrs. ADAMS & CO., on whom they are authorized to draw Bills of Exchange for any amount, payable in New Orleans, New York and all the principal cities of the Atlantic States.

three reported covers

Wells, Fargo & Co's Express (Jul 1852 - present)

trunk route

The famous bank and nationwide express was formed by Henry Wells and William Fargo on March 18, 1852 when other directors of American Express did not wish to open offices in California. Agents of the new firm arrived in California in July 1852 and after a long series of acquisitions, including Gregory's Express, Todd's Express, and Hunter's Express, they had 24 branch offices in operation by January 1855. With the collapse of Adams & Company in February 1855, and after surviving the financial panic of that year, Wells Fargo emerged as the dominant banking force and leader in the express business.

Image of Samuel Brannan, center, with Thomas Larkin and William Howard.

Brannan brought 238 Mormons to California by ship in 1846 and started publishing *The California Star* in 1847. This newspaper first proclaimed the discovery of gold the following on May 12, 1848.

Brannan became the wealthiest man in California supplying the needs of the gold rush from his store at Sutter's Mill and from his real estate dealings in San Francisco that followed.

EDWIN B. MORGAN, President.
JAMES MCKAY, Secretary.

This Company, having completed its organization as above, is now ready to undertake a general Express Forwarding Agency and Commission Business; the purchase and sale of Gold Dust, Bullion and Bills of Exchange; the payment and collection of Notes, Bills and Accounts; the Forwarding of Gold Dust, Bullion and Specie, also Packages, Parcels and Freight of all descriptions, in and between the city of New York and the city of San Francisco, and the principal cities and towns in California; connecting at New York with the lines of the American Express Company; the Harnden Express; Pullen, Virgil & Co.'s Northern and Canada Express, and Livingston, Wells & Co.'s European Express.

They have established Offices and faithful Agents in all the principal cities and towns throughout the Eastern, Middle and Western States; energetic and faithful messengers, furnished with iron chests for the security of treasure and other valuable packages, accompanying each Express upon all their lines, as well in California as in the Atlantic States.

They will immediately establish offices at all the principal towns in California, and run messengers on their own account for the purpose of doing a general Express business. As soon as such arrangements are completed, notice will be given. jyl

California Penny Post Co. (Jun 1855 - Oct 1855)

trunk route

The California Penny Post was established by Henry L. Goodwin in San Francisco on June 25, 1855. The latest advertisement found appeared in the October 4, 1855 issue of *Prices Current & Shipping List*. Exceptionally, this company operated only as a letter express and did not carry express matter. They provided city delivery via their local post. Goodwin ran afoul of the San Francisco postmaster as he usually used government mails for carriage between cities.

The Stockton Division Expresses

Stockton division

The Stockton division expresses (denoted by horseback rider with "Stockton division" beneath) primarily served the Southern Mines and the smaller supply towns in the area as shown in the shaded area on the map. Mail was received from steamboats operating from San Francisco or points up the Sacramento River. Like the other mountain express companies, the portion of service beyond Stockton was handled by stage and horse.

During the Pioneer period, Todd & Company and Newell & Co. expresses operated between Stockton and San Francisco by steamer. Although they also operated by coach to Sonora as well, the leading divisional express serving the mountain mining camps was Brown's Express.

map of Stockton Division service area (shaded)

Stockton Post Office

The first post office in Stockton was established by special Agent Allen on his visit in June 1849. Mail service did not commence for some months a contractor could not be found to provide service. On November 8, 1849 the postmaster appointment was confirmed in Washington.

19 December 1849 Stockton, California to Steuben, Maine, manuscript postmark and 40¢ postage due

letter of William P Shaw, dated at Stockton mentions: *I arrived here some time in Sept. I have enjoyed good health ever since I left the States. It was rather late in the season when I arrived but I have done tolerable well and have a good prospect of making money in the Spring.*

a very early use as PM appointment confirmed in Washington in November 1849

Reynolds & Co's Express (Jan 1850 - Oct 1851)

Stockton division

Browns Express (Jun 1850 - Apr 1853)

Reynolds & Co's Express was founded by two Reynolds brothers and J. P. D. Wilkins in January 1850. They operated on steamboats and stages to Stockton. The first notice in the Sacramento papers mentions their service will use stage coaches of Messenger & Co between Sacramento and Stockton. Reynolds added Todd as a partner in October 1851 and the new company continued on the routes.

Brown's Express was one of the principal express operators to the southern mines. Founded by W. A. Brown in June 1850, he connected with both Todd & Co. and Newell & Co. operating between Stockton and San Francisco and they, in turn connected at San Francisco with Adam's Express for ocean to ocean service. Brown was murdered on April 2, 1853 and the express continued under his name even though it was then operated by Adams Express.

ANG. REYNOLDS. A. S. REYNOLDS. J. P. D. WILKINS
Reynolds & Co's Express
From Sacramento City to Stockton, and all parts of the Southern Mines.
REYNOLDS & Co. having been engaged in the Express business for the past seven months in the southern mines, trust that the reputation they have earned there will be a sufficient guarantee that their business on this route will be done with promptness and dispatch. The Express will run in connection with Messenger & Co's Sacramento and Stockton stage, leaving Sacramento city on Tuesday, Thursday, and Saturday, and Stockton on Monday, Wednesday, and Friday. Orders may be left at Still, Conner & Co's Periodical Depot, Placer Times' building, on Second, between K and L streets, or at the Missouri Hotel on J street, Sacramento city, and at Reynolds & Co's Express office in Stockton.

C. A. Todd's Express (Apr 1852 - Sep 1853)

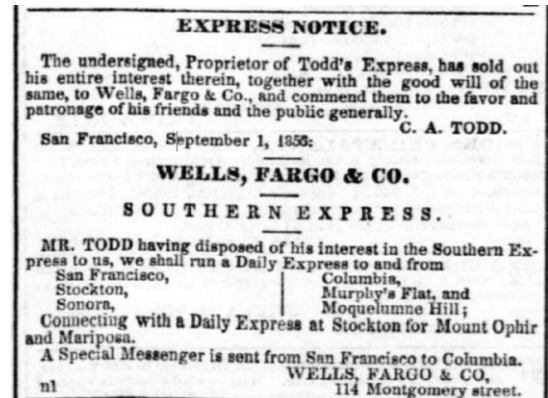

Stockton division

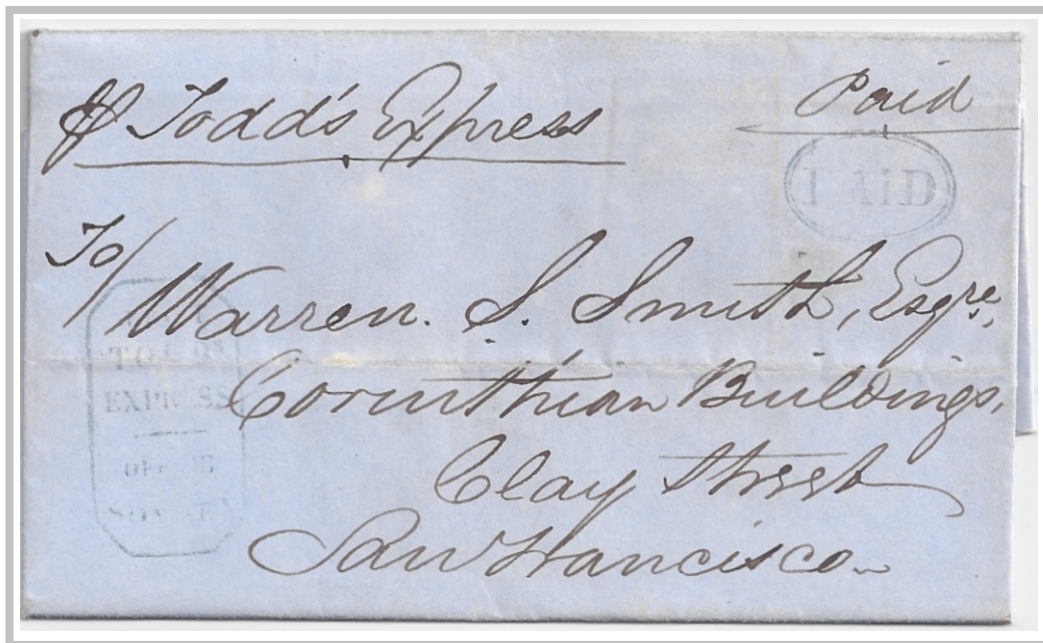

C. A. Todd, no relation to Alexander Todd, purchased Reynolds, Todd & Co's Express on April 22, 1853. He operated his express between San Francisco and Stockton by steamer and ran daily stages from Stockton to the mines along the Moquelumne and Stanislaus Rivers. He he sold the company to Wells, Fargo & Co on September 1, 1853.

The San Francisco Division Expresses

San Francisco division

San Francisco in November 1849, view by Bayard Taylor

The San Francisco division express companies (denoted by horseback rider with "San Francisco division" beneath) did not have to operate over rough mountain terrain to mining camps. Instead, their service area included business and commercial centers around the Bay and Delta as well as coastal California ports.

Many of the areas, such as San Jose, could be easily reached by steamboat or over well developed stage coach roads. Reaching additional coastal California ports required the use of sailing vessels or steamers over longer routes.

As a result, the companies servicing this division were a much more diverse group than their counterparts elsewhere. The companies serving the coastal towns or inland towns situated on stage roads generally carried mail completely outside of the government mails. Express matter and letters could be dropped off and collected directly at the express offices with no government mail service involved.

Adams & Co. to their Creditors.

Comments which have been made on the closing of our House, seem to require that before presenting to our creditors the proposition which is below, I should acquaint the public, as our friends are already acquainted, with the facts which demonstrate that the real causes of our suspension were not of our own making.

The stoppage of a well known and popular House is misfortune and humiliation enough, without having to bear responsibility for the faults of others. Had our purposes and efforts been seconded as they should have been, in quarters where we had a right to expect it, the calamity which has just overtaken the community would never have happened.

Adams & Co to their Creditors

Second page article includes statement of I. C. Woods describing the causes of the collapse of Adams Express two weeks prior.

The Sacramento Division Expresses

Sacramento division

The Sacramento division express companies (denoted by horseback rider icon with "Sacramento division" beneath) operated from the primary hub of gold mining activities in California. Sacramento City was located at the point where the American River joined the Sacramento River. The American River watershed area was home to the first gold discovery at Sutter's Fort in 1848 and also many of the earliest producing placer mines.

The influx of a large number of gold miners to the area in 1849 brought with it an enormous load on the transportation and banking systems. The miners working in the isolated mining camps up the Feather River and its branches required foodstuffs, mining equipment, a way to transport their gold to buyers and a way to communicate with the outside world.

map of Sacramento Division service area (shaded)

Typically, the Sacramento Division express companies carried supplies, newspapers and mail from Sacramento City to the miners and returned with gold to be shipped, via brokers and banking centers, to the East. In the Sacramento City Division, the express companies initially transported their cargo on foot, horseback or in small carts. The Sacramento Valley Railroad was not completed until 1856.

important content letter (partial transcript on following page) from one of the first overland 49'ers, JH Blair, writing from the site of Sutter's original gold discovery includes description of the journey to California, method of using rocker to extract gold, and his success: *I have worked 14 days and averaged an ounce per day*

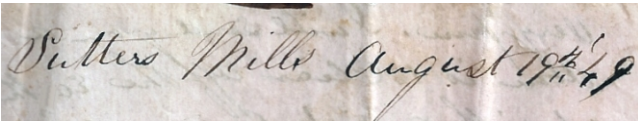

carried in the first transcontinental through mail bags from Sacramento City, via Panama, to the East

Sutter's Fort Privately to Sacramento City

On January 28, 1848 James Marshall met privately with Sutter and showed him the gold nuggets that Marshall had found during the construction of Sutter's mill, along the American River only four days earlier. The site is within today's downtown Sacramento.

Sutter's Fort in 1849

Letter of J(ohn) H(ervey) Blair includes: *We arrived here the last of July in good health without the loss of much property or any of our Company. Our trip was a short one considering the distance, to me a pleasant one, to many I fear it is the reverse. Our success depended upon our early start out and cracking ahead which gave us the advantage of pasture and that of being out of the dust, from Green River to Ft Hall we broke the ways after which a few mule teams overtook us and then there was racing and chasing Our Company, which left St Jo(seph) together stuck together till the end of the journey*

Well I have not time nor paper to give you any detailed account of the journey you want to hear what we are doing and what California is. We have been digging on Weaver Creek 6 miles from the Mills in Company with 6 of our company. I have worked 14 days and averaged an ounce per day, which is considered good for one who has no experience in mining. We work for it and (make) no mistake the gold is found in bands along the streams and in the Channel of the same where we have been the gold is very fine. I will send you a sample, the first thing to be done is to clear off the earth and loose stones then dig it up with a pick, carry it to your machine and shovel it into a hopper which has a shot iron bottom which has holes punched through to let the gold and dirt through and prevent the rocks from going in. One rocks it and another pours on

miners working the sluice (long tom) as described in letter

water, two small bars stop the gold and emery the water carries the dirt over, after a sufficient quantity is gathered it is taken in a pan and cleaned. Now then you have the process of obtaining the precious metal and if any one doubts my assertion that it makes ones back ache worse than hauling rails let him try it that(s) all. ...

(the) American Fork is the place we expect to locate on, the prospect for making a fortune here depends very much upon the exertion one makes, with health, perseverance, proper management very few fail of success. Our provision will last about 2 months longer, to you prices will appear very high but when you take into consideration the wages that are paid they will not appear out of the way. At the City provisions sell for

We expect to leave here on account of the water drying. The Middle Fork of

I don't advise any one to come, nor do I regret coming by any means. I would not take \$500 for what I have seen and learned but if any one comes tell them to start with good teams and light loads and early in the Spring... Now give my love to all my acquaintances and tell them to write direct to California Sacramento City (Sutter's Fort) ..

Hoffman & Co's Express (Feb 1850 - Apr 1851)

Sacramento division

Hoffman & Co's express was founded by William M. Hoffman who first advertised a single express messenger returning from San Francisco to New York in February 1850. Apparently he operated briefly carrying mail from Sacramento the mines. In December 1850 he advertised with his brother as merchants in Sacramento selling miner's supplies. The notice shown below lists over 500 letters remaining at Hoffman & Little's Express, which can be found at Gregory's Express office. By May 17, 1851 Hoffman and Little are listed as Gregory's agents in Nevada City.

Hunter & Co's Express (Mar 1851 - Jul 1854)

Sacramento division

Alexander Hunter launched his express service with a small newspaper notice in the March 27, 1851 *Sacramento Transcript* stating "will leave for Coloma, Placerville and towns in that vicinity." In April he appears listed by Palmer's Express as their conjunctive express serving the area. By May he advertised as serving all forks of the American River. He later allied with Gregory's and Adams expresses before selling to Wells Fargo & Co. in July 1854 and becoming their agent in Placerville.

**HUNTER & CO'S
SEMI-WEEKLY EXPRESS,**

TO all parts of El Dorado County, and the whole of the bars on the South, Middle and North Forks of the American river, including

Taylor operated a semi-monthly express from Shasta, via Hamilton City, Yuba City and Marysville to Sacramento between June 1851, the date of his first advertisement, and the date of his last ad on April 28, 1852. He connected at Sacramento with Gregory's Express for onward service to San Francisco.

Taylor's Sacramento and Shasta
SEMI-MONTHLY EXPRESS.

 Leaving Sacramento about the 1st and 15th of every month, via Marysville Yuba City, and Hamilton City, and intermediate points, en route for Shasta, connecting at Shasta with branch Express trains for all the north and north-western mines. All business usually done by Expressmen will be attended to by the undersigned with promptness and dispatch. Particular attention paid to the forwarding of gold dust to the Atlantic States through Messrs Gregory & Co's well known and unrivalled Express. Also, to obtaining letters for miners and others, from the San Francisco, Sacramento, and Marysville Post Offices.

L. W. TAYLOR.

N. B.—Letters and packages for Shasta and the north-western mines, may be left at Gregory & Co.'s Express Office, on 2d street, between J and K.

Adams & Co's Expresss (Nov 1849 - Feb 1855)

Sacramento division

Adam's & Co's Express evidently took over many of the Hunter & Co's Express routes in Eldorado and Yuba counties. By late 1854 Adams' agents probably utilized California Stage Company for service on the routes (see advertisement below).

CALIFORNIA STAGE COMPANY.
OFFICE AT THE OR-
LEANS HOTEL, Sacramento.
 STAGES leave regularly for the following places: Nevada, Ophir, Auburn, Yankee Jim's, Georgetown, Placerville, Mormon Island, Coloma, Drytown, Jackson, Mokelumne Hill, Stockton, Sonora, Marysville and Shasta, and all parts of the Northern and Southern mines, every morning, as follows:
 Nevada and intermediate places, at 5½ o'clock A. M.
 Georgetown " " 6 " "
 All other places, 6½ " "
 Accommodation line for Mormon Island, 1¼ o'clk P.M.
 All passengers will be called for at their residences, and the utmost attention and care paid to them and their baggage.
 Stages arrive in time every day for the San Francisco boats.
 J. BIRCH, President C. S. Co.
 J. P. DEIGHAN, Secretary. ol

Concord coach of the California Stage Co.

Bowers Express (1850 - 1852)

Sacramento division

Bowers operated between Nevada City and San Francisco via Grass Valley and Rough and Ready when they started in the express business in 1850. After June 1851, the express worked in concert with Freeman & Cos Express for carriage between Sacramento and San Francisco.

The Marysville Division Expresses

Marysville division

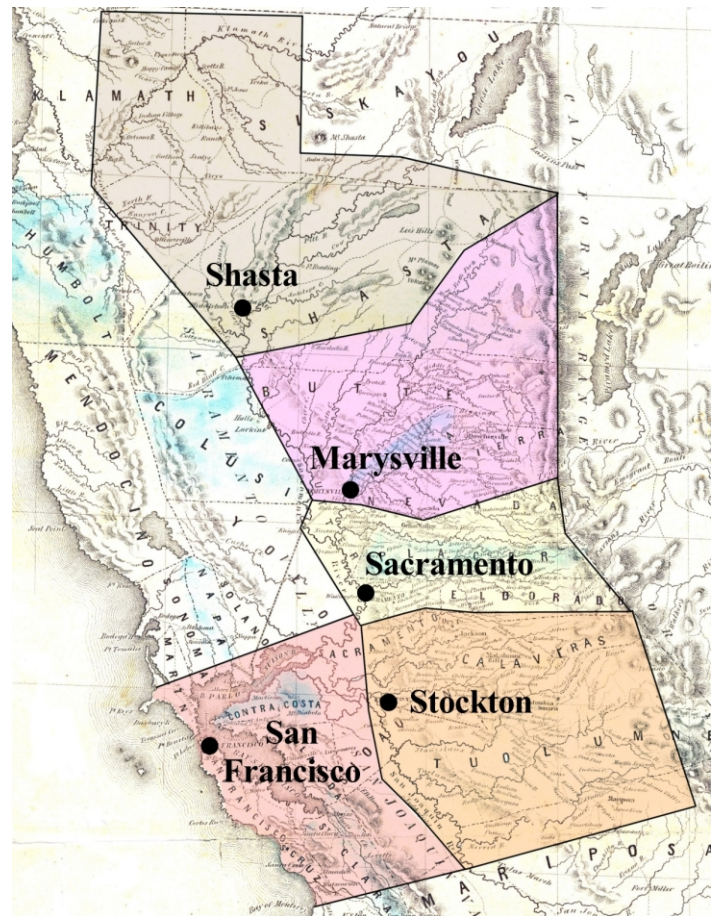

View of the Plaza at Marysville, circa 1854

The Marysville division express companies (denoted by horseback rider with "Marysville Division" beneath) gained prominence after gold mining activities on the upper Feather and Yuba Rivers reached significant levels. It developed into a primary transportation hub and river port as steamboat routes were extended from Sacramento northward on the Sacramento River to Marysville.

In general, the mining camps in northern California that were served from Marysville were less concentrated than those in the Sacramento division. They also generally required longer transportation lines, particularly following the 1853 mining boom near Shasta. These long overland trips mostly traversed flatter terrain which allowed the use of stage coaches as well as carts at an early date. It should be mentioned that Marysville also served as an express center for the early mines in southern Oregon Territory.

The map at right shows all five divisional express service areas.

map showing divisional express service areas

Gregory's Express (Apr 1850 - Nov 1852)

Cram Rogers & Co's Express (1851 - Mar 1855)

Marysville division

Gregory's Express primary listing in Ocean to Ocean section.

Cram Rogers & Co's Express operated to the mines in the Shasta area and extending into mining areas in Oregon. Over the period of operation, from 1851 until March 27, 1855, they connected with Gregory's, Adams, and Newell & Co. expresses.

Everts & Co's Feather River Express (fall 1851 - Jul 1854)

Marysville division

In mid 1851 Frank D. Everts began operating a one man express from Marysville to mining camps on the Yuba River and Feather Rivers. He connected with Adams Express at Marysville for steamboat service to Sacramento and San Francisco. In the winter of 1852-1853 the firm was superseded by Everts, Snell & Co's Express.

fewer than ten recorded examples of the handstamp

Everts Snell & Co's Feather River Express (1852 - Jul 1854)

Marysville division

In winter 1852-1853 Frank Darwin Everts, after operating his Everts & Co's Express since 1851 formed a partnership with John Adam Snell to better serve the mines of the Feather River area. They connected with Adams Express at Marysville for steamboat service to Sacramento and San Francisco. On July 25, 1854 the partnership was dissolved and Everts continued with his brother Henry from new headquarters in LaPorte.

19 January 1853 Dalton, Ohio, via New York City to Sacramento by government mails, 10¢ postage due picked up by Everts Snell & Co's Feather River Express for delivery to Lexington House (near Downieville) pencil "Lex" at foot and \$1.50 express fee due which includes the 10c postage

about twenty recorded of the handstamp, this the only example used to Lexington House

Fargo & Co's Feather River Express (1852 - 1853)

Marysville division

Annon Fargo and W. E. Singer were in an express partnership for few months in 1852, known as Singer and Fargo's Express. Annon Fargo decided to go out on his own in later 1852 when W. S. Dean was brought into the company. Fargo & Co's Express operated from 1852 to 1853, using Marysville as a base to serve the mines along the North Fork of the Feather River.

F. Rumrill & Co's Northern Express (Aug 1852 - 1855)

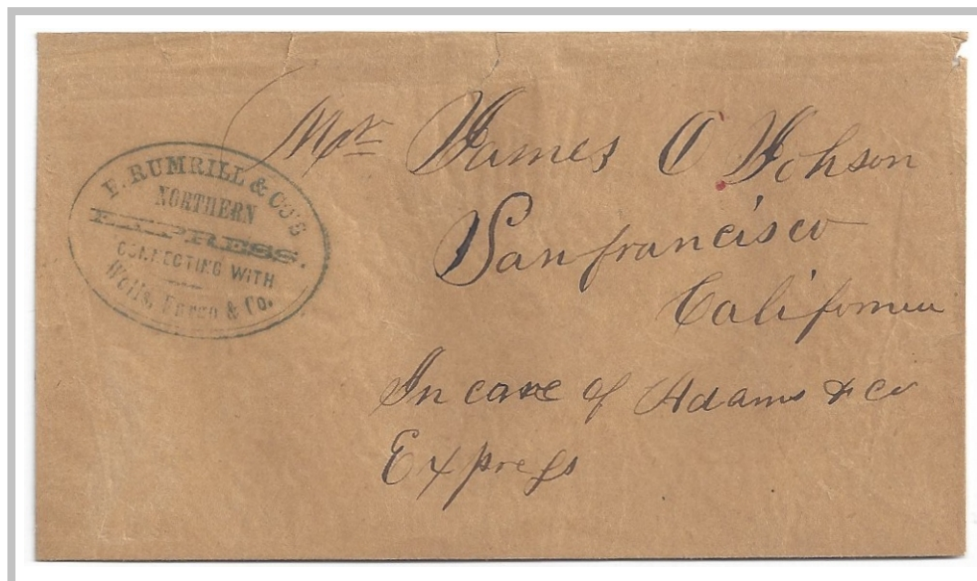

Marysville division

In 1852 Frank Rumrill began operated an express from Marysville up the North Fork of the Yuba River to Fosters Bar. In 1853 routes were extended as far as Downieville. He connected with Well Fargo at Marysville and likely served as their agent at Marysville. He was also an agent for Gregory's Express at Marysville for a short period in 1853. Rumrill bought out Beck's Express in July 1854, which extended his line north from Downieville into the Gibsonville Ridge area. He sold his express business to Langton's Express in 1855.

RUMRILL & CO'S NORTH-ERN EXPRESS—Connecting with WELLS, FARGO & CO., Daily—To and from the principal places in the NORTHERN MINES.
 MARYSVILLE, HANSONVILLE,
 FOSTER'S BAR, GIBSONVILLE,
 CAMPTONVILLE, CHANDLERVILLE,
 GOODYEAR'S BAR, PINE GROVE,
